

Lab Report – File Transfer Protocol

(FTP)

Last Name : Belkacem

First Name : Nacim

GRP : 1.2

Objective of the practical work:

Set up and test FTP, TFTP and DHCP services in a local network.

Hardware and Software Used :

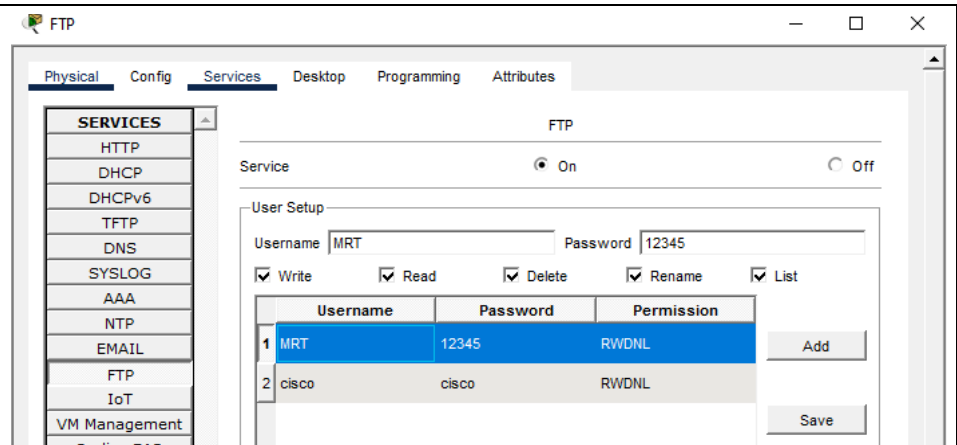

- Packet Tracer
- 1 Routeur
- 1 Switch
- 3 PC
- 1 Serveur

Network Topology:

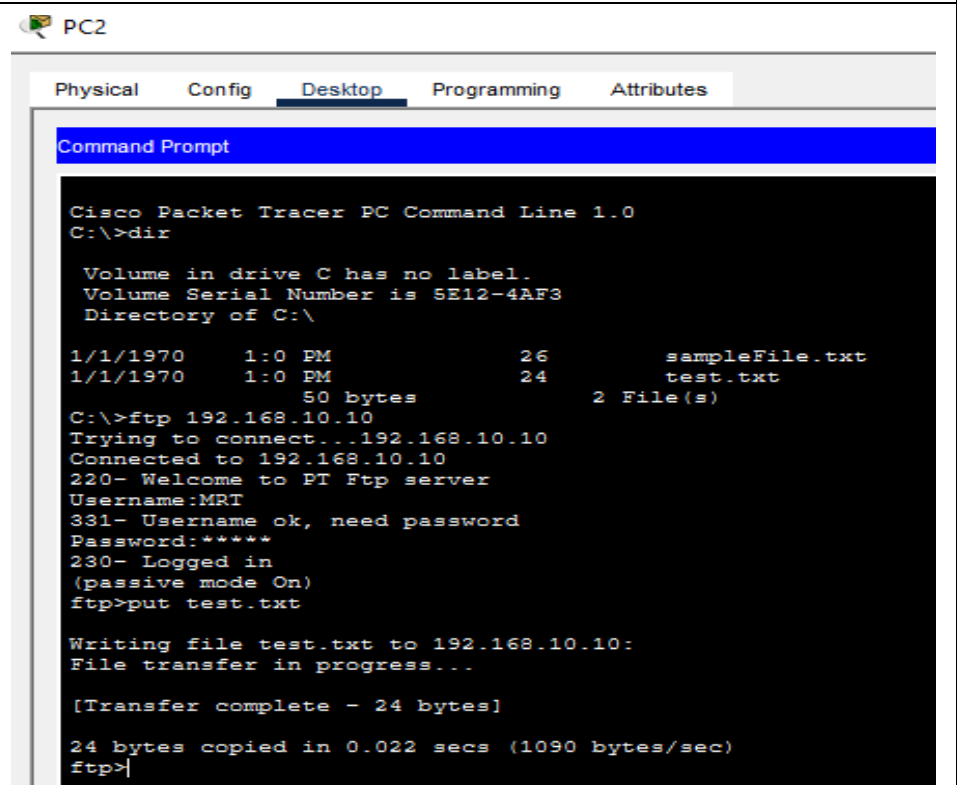

Local network consisting of a router connected to a switch, linking three PCs and a server.

Configuring FTP Server : Activating the FTP service on the server with the IP address 192.168.10.10.

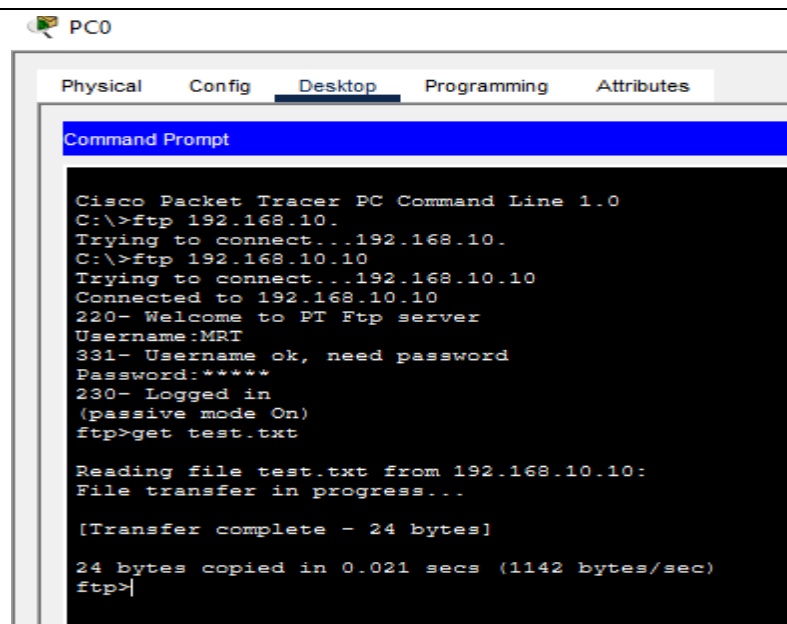

Creation of test.txt File on PC3 :

Connection to the FTP Server from PC3

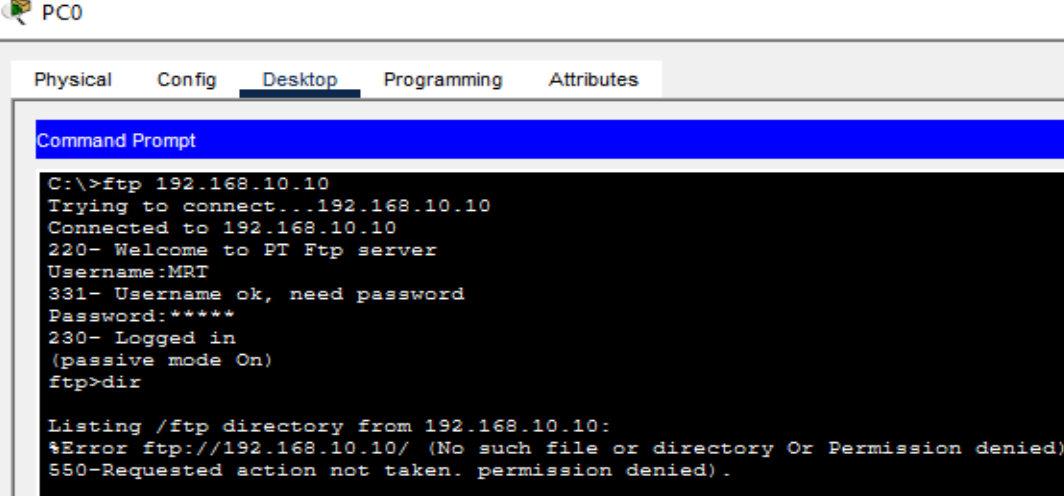

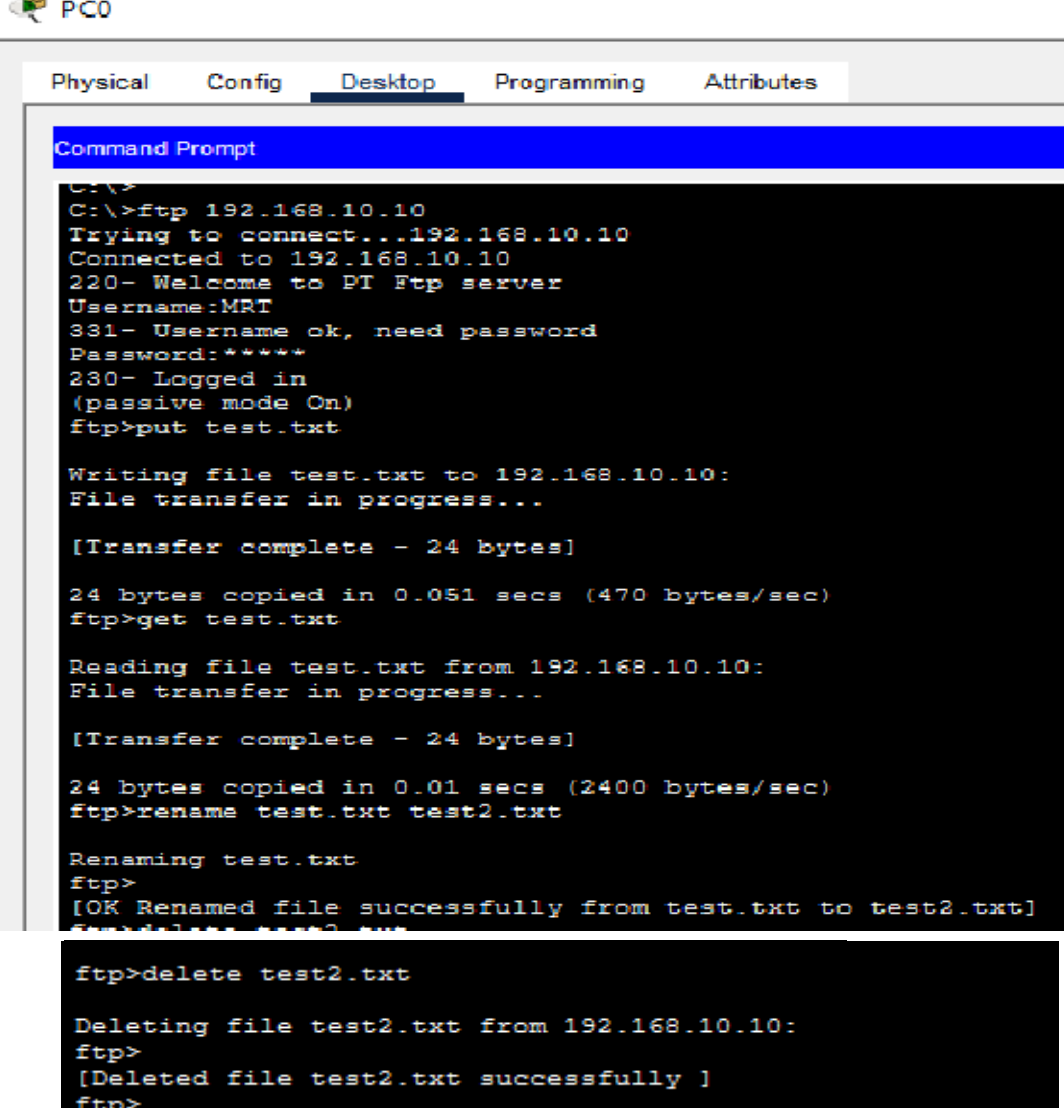

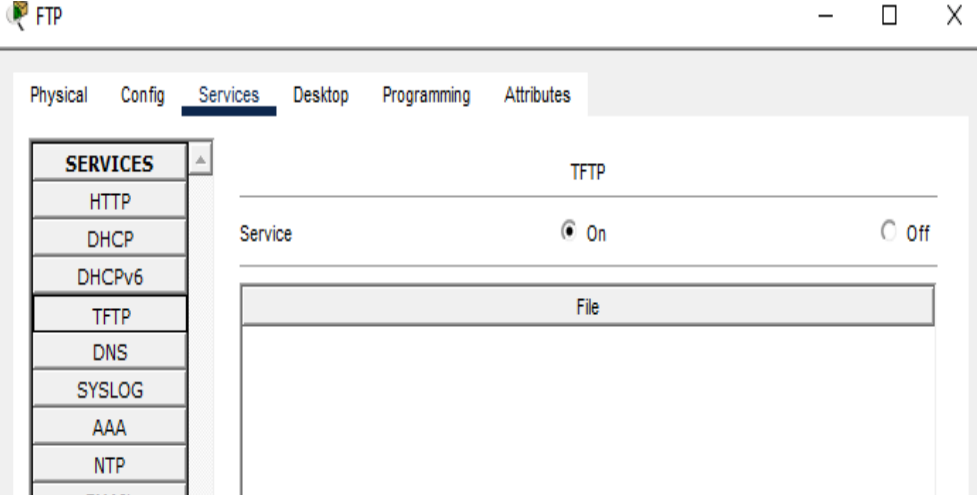

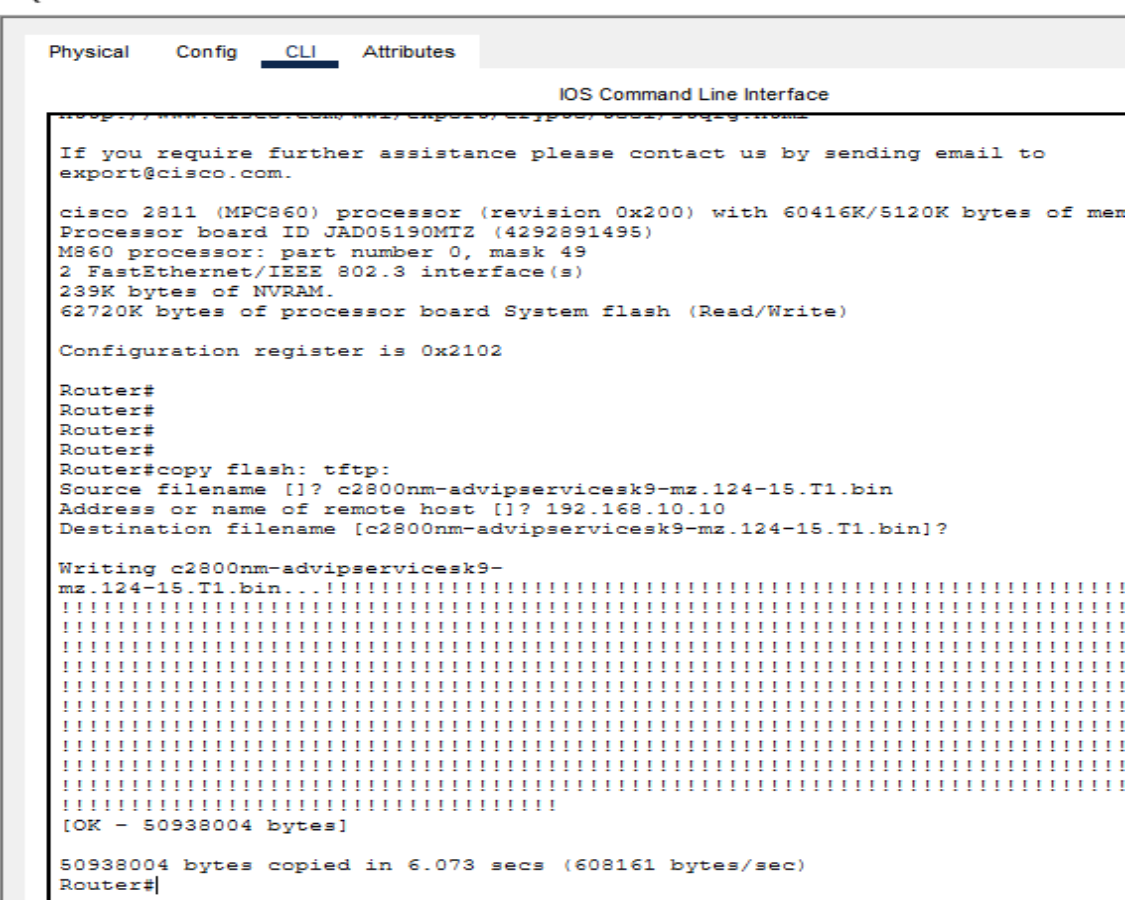

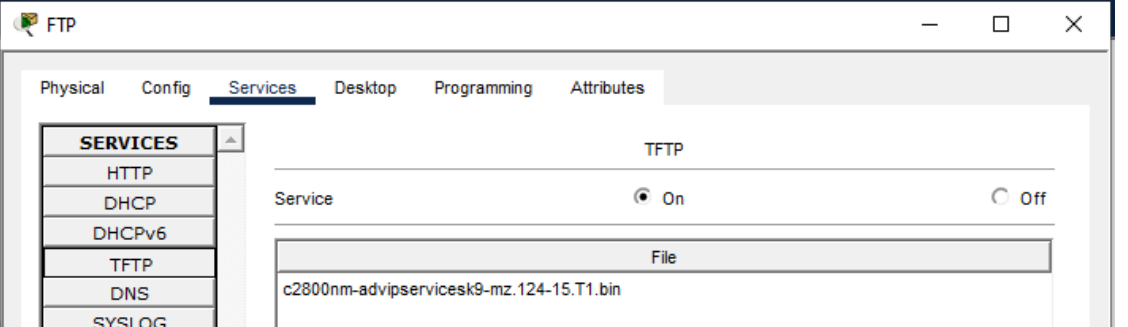

File Download from PC1

Removal of List Permission :

Disabling the List permission for the MRT user.

TFTP Service Activation (And Delete all existing image files)	
Router Configuration	
Verify the contents of the TFTP server	

Assignment :

Repeat the same laboratory exercise, but this time use a DHCP server to automatically assign all IP addresses, except for the FTP server, which must retain a static IP configuration

Conclusion

The lab allowed us to configure and test the FTP, TFTP, and DHCP services, as well as to verify the functionality of permissions and the transfer of the IOS image.
